Subject: Draft Agenda for Call

I added two items to the list sent by Karl earlier this morning. They are the development of the Phase 2 IAG with COE, and CAG meeting preparation.

Results of site conference with PRP group on design/alignment
COE IAG activation (how do we use STL at this phase) and *development of Phase 2 IAG*
Status of preconst air monitoring system
MDNR update (what they're doing finding saying re: SSE)
Rollout calls later today
New class action suit implications
CAG meeting preparations
